## **DETAILED ACTION**

### ***Response to Arguments***

1. In view of the Appeal Brief filed on 11/12/03, PROSECUTION IS HEREBY REOPENED. A non-final rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 34, 35 and 54 are rejected under 35 U.S.C. 102(b) as being anticipated by Dickerhoff et al. (US 5360439) In column 3 lines 1-28, Dickerhoff et al. disclose a method for controlling airflow through an inflatable device and an apparatus for warming

a person as recited in the claims. The snap disclosed by Dickerhoff as a means for closing the port is understood by Examiner to be a plug.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 35, 56 and 70 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berke et al. (US 5304213) further in view of Dickerhoff et al. Berke et al. teach all of the limitations of the claims except a plug removably received in at least one port of the two ports. Dickerhoff et al. disclose the use of a snap, which is understood by Examiner to be a plug. The snap is a means to allow reclosing of the port after the permanent seal has been broken. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a snap as taught by Dickerhoff et al. as a means of reclosing the port of Berke et al. once the permanent seal has been broken.

***Allowable Subject Matter***

6. Claims 36, 37, 40, 44-47, 57-59, 61 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
